

Railroad Information

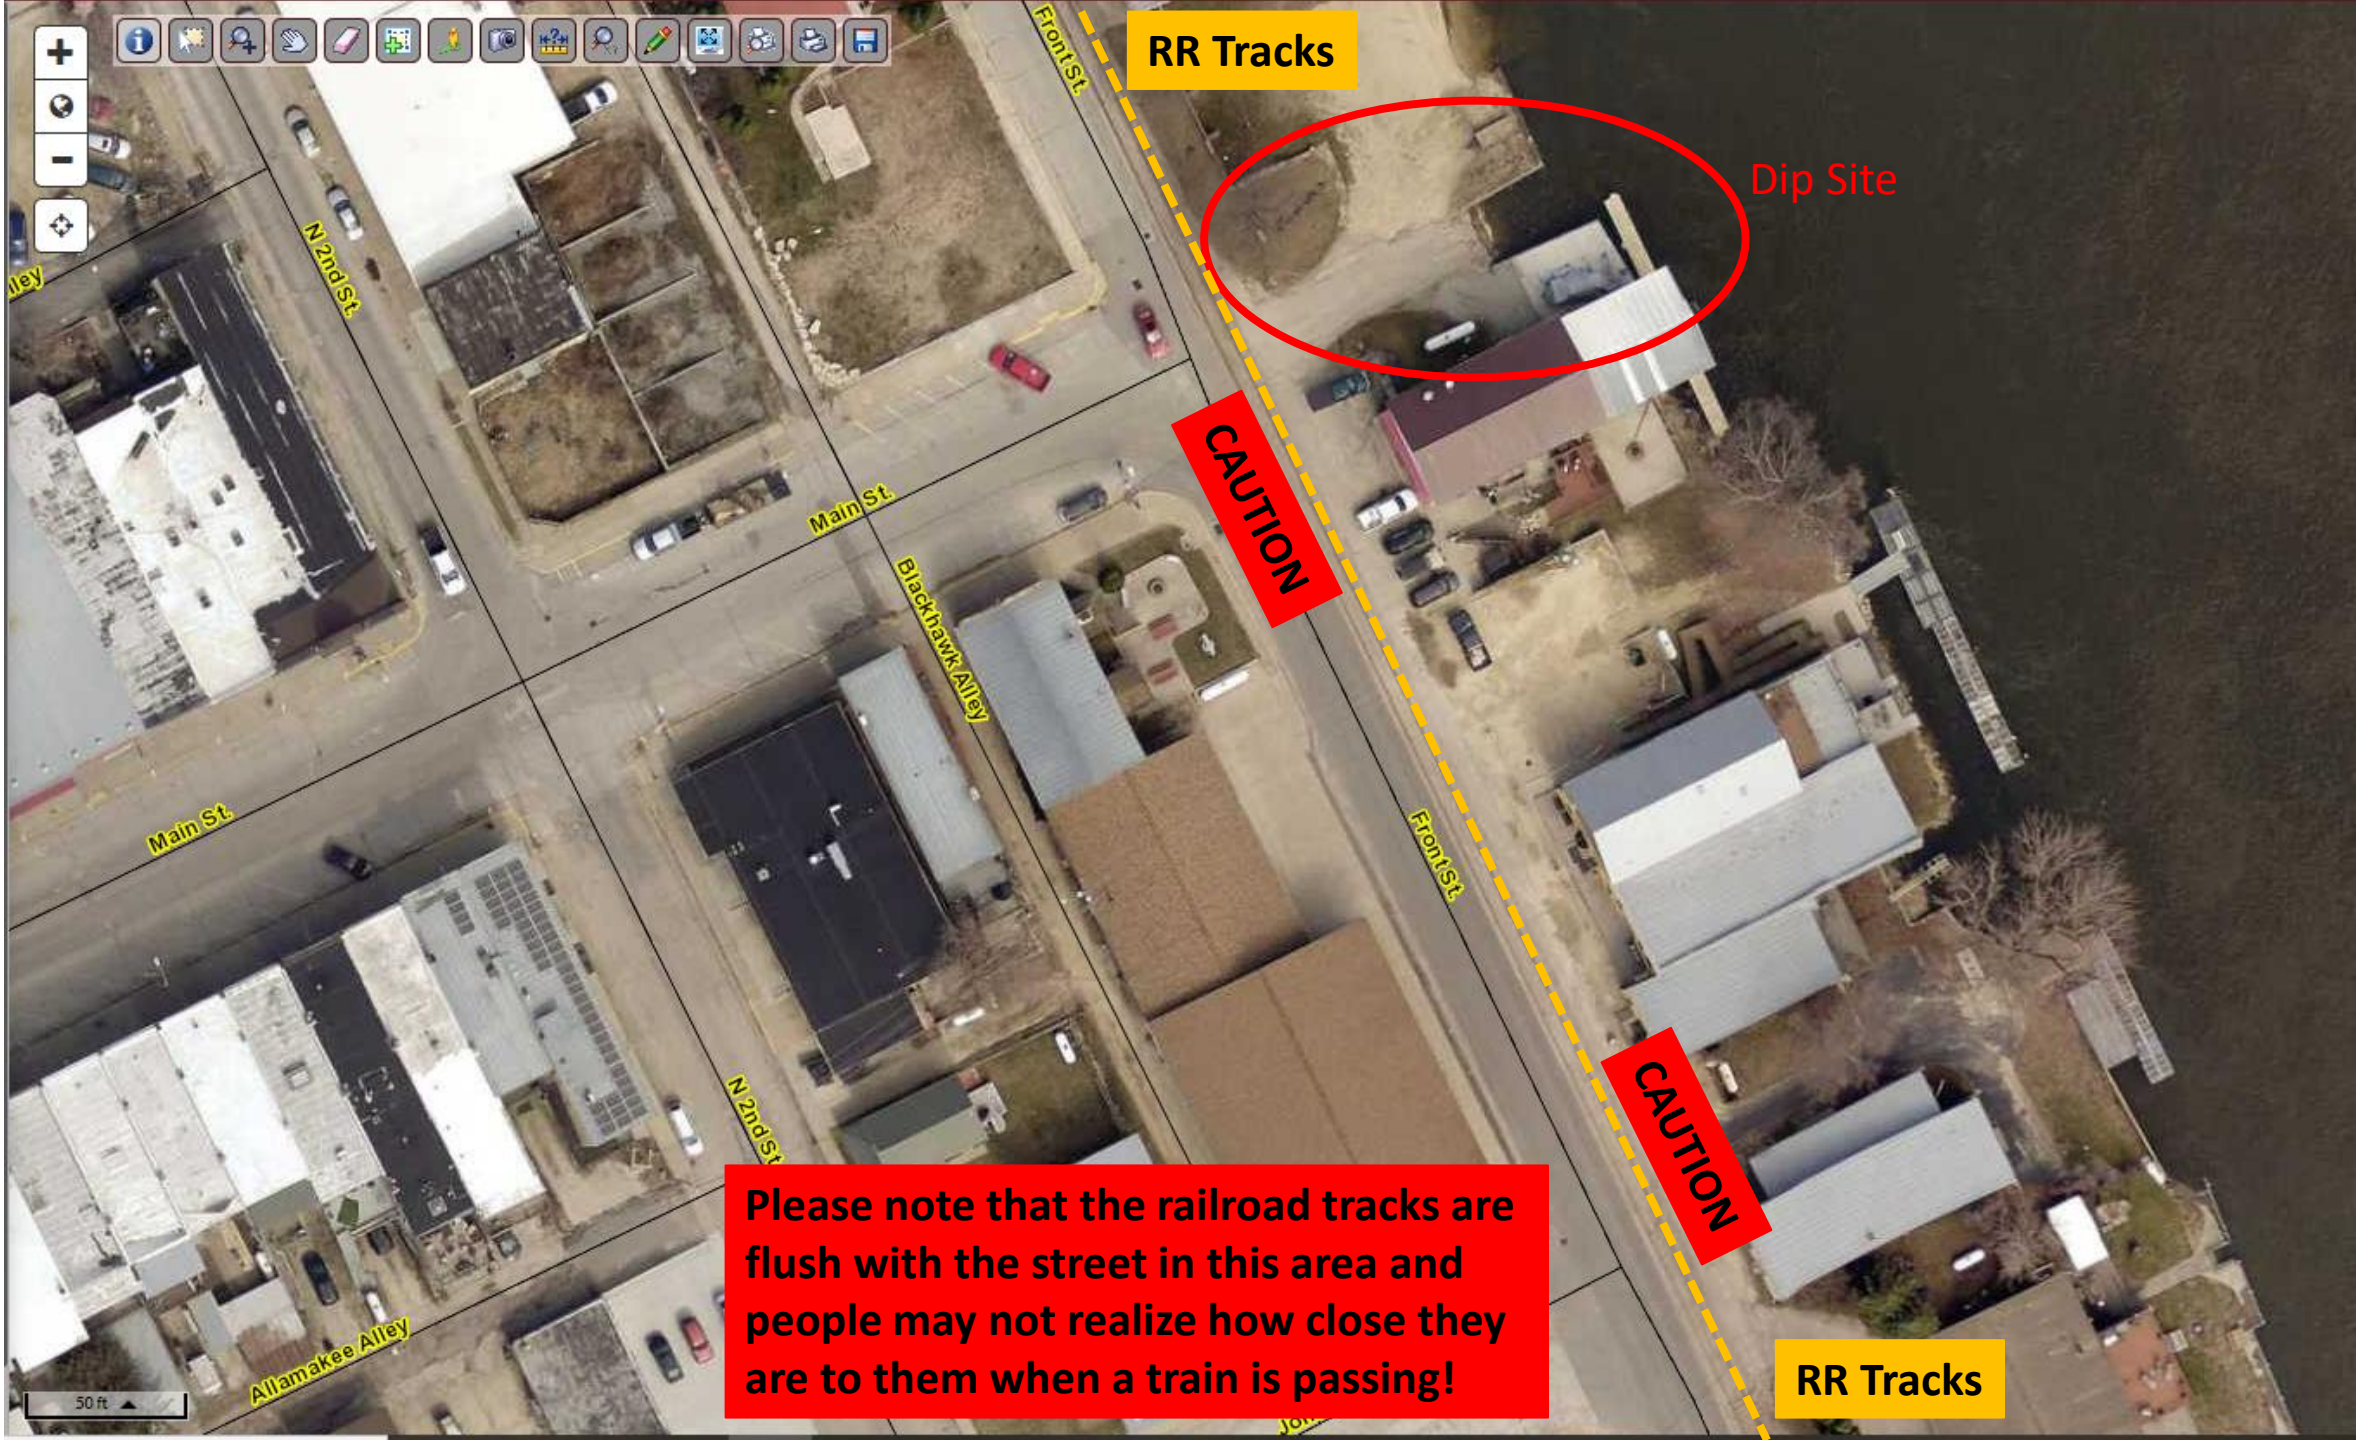

The City of Lansing has an active railroad that runs parallel with the Mississippi River south and north in orientation through the community.

The tracks run along the Great River Rd/X52 and Front Street as you come into Lansing and stay along the river the entire way as seen on this map.

Please see the second page for closer view of the tracks near the dip site.

Currently, a representative from the Canadian Pacific Railroad will be assisting Lansing RAGBRAI at the dip site.
